

KUTES

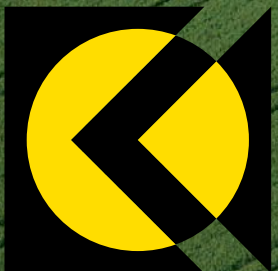

**THE NEW
IRON AGE**

COMPANY PRESENTATION

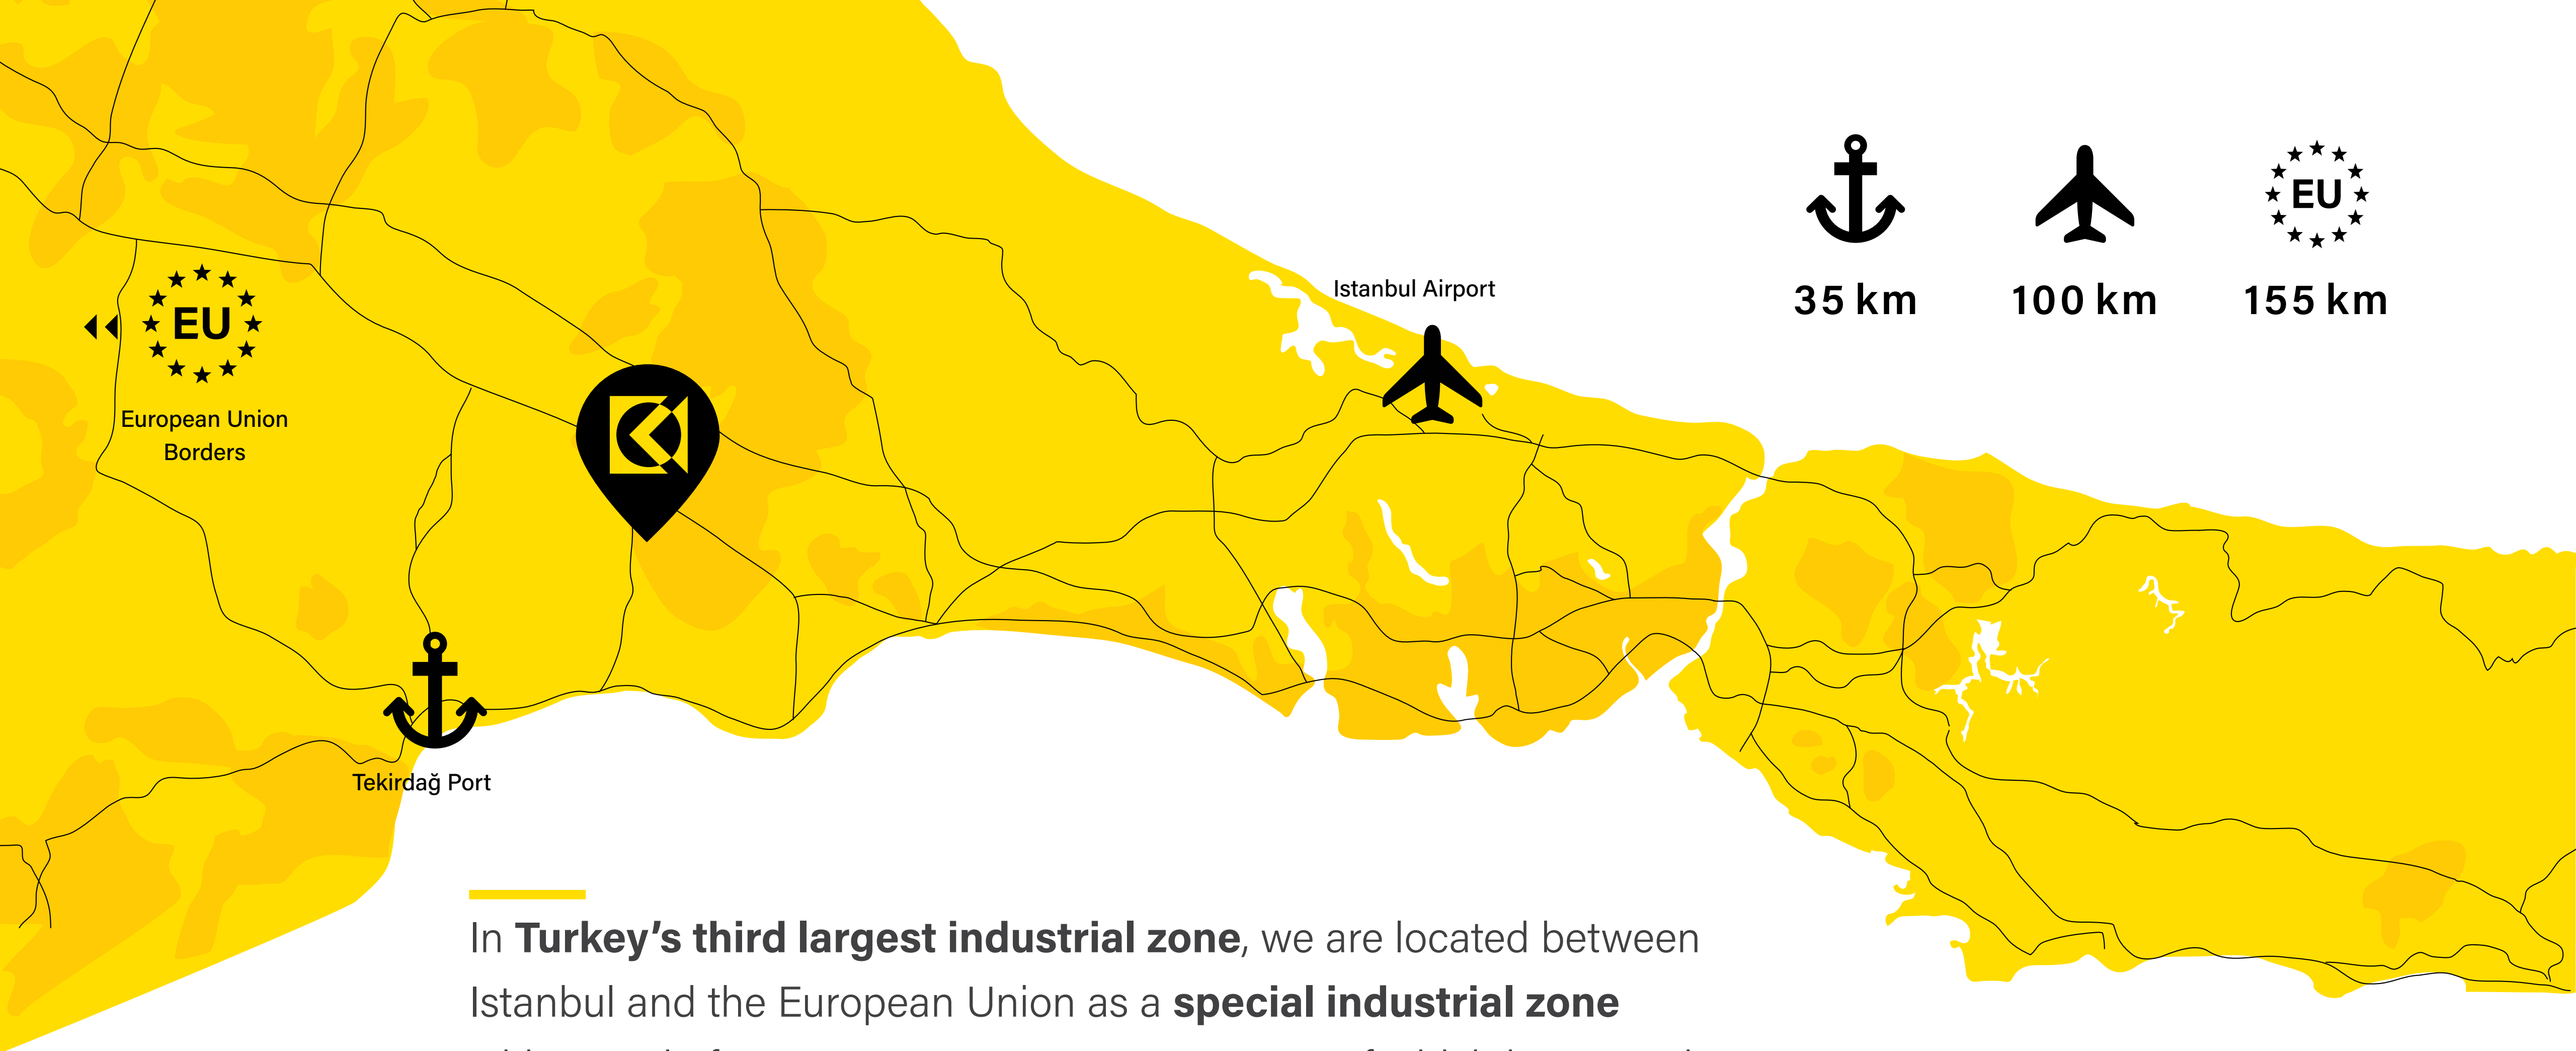

WE ARE AN IRON LIKE BRAND

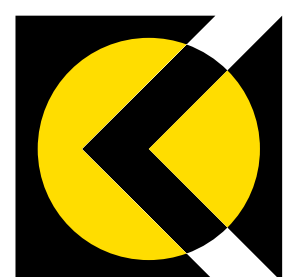

At **Kutes**, our work is much more than iron and our production operations.

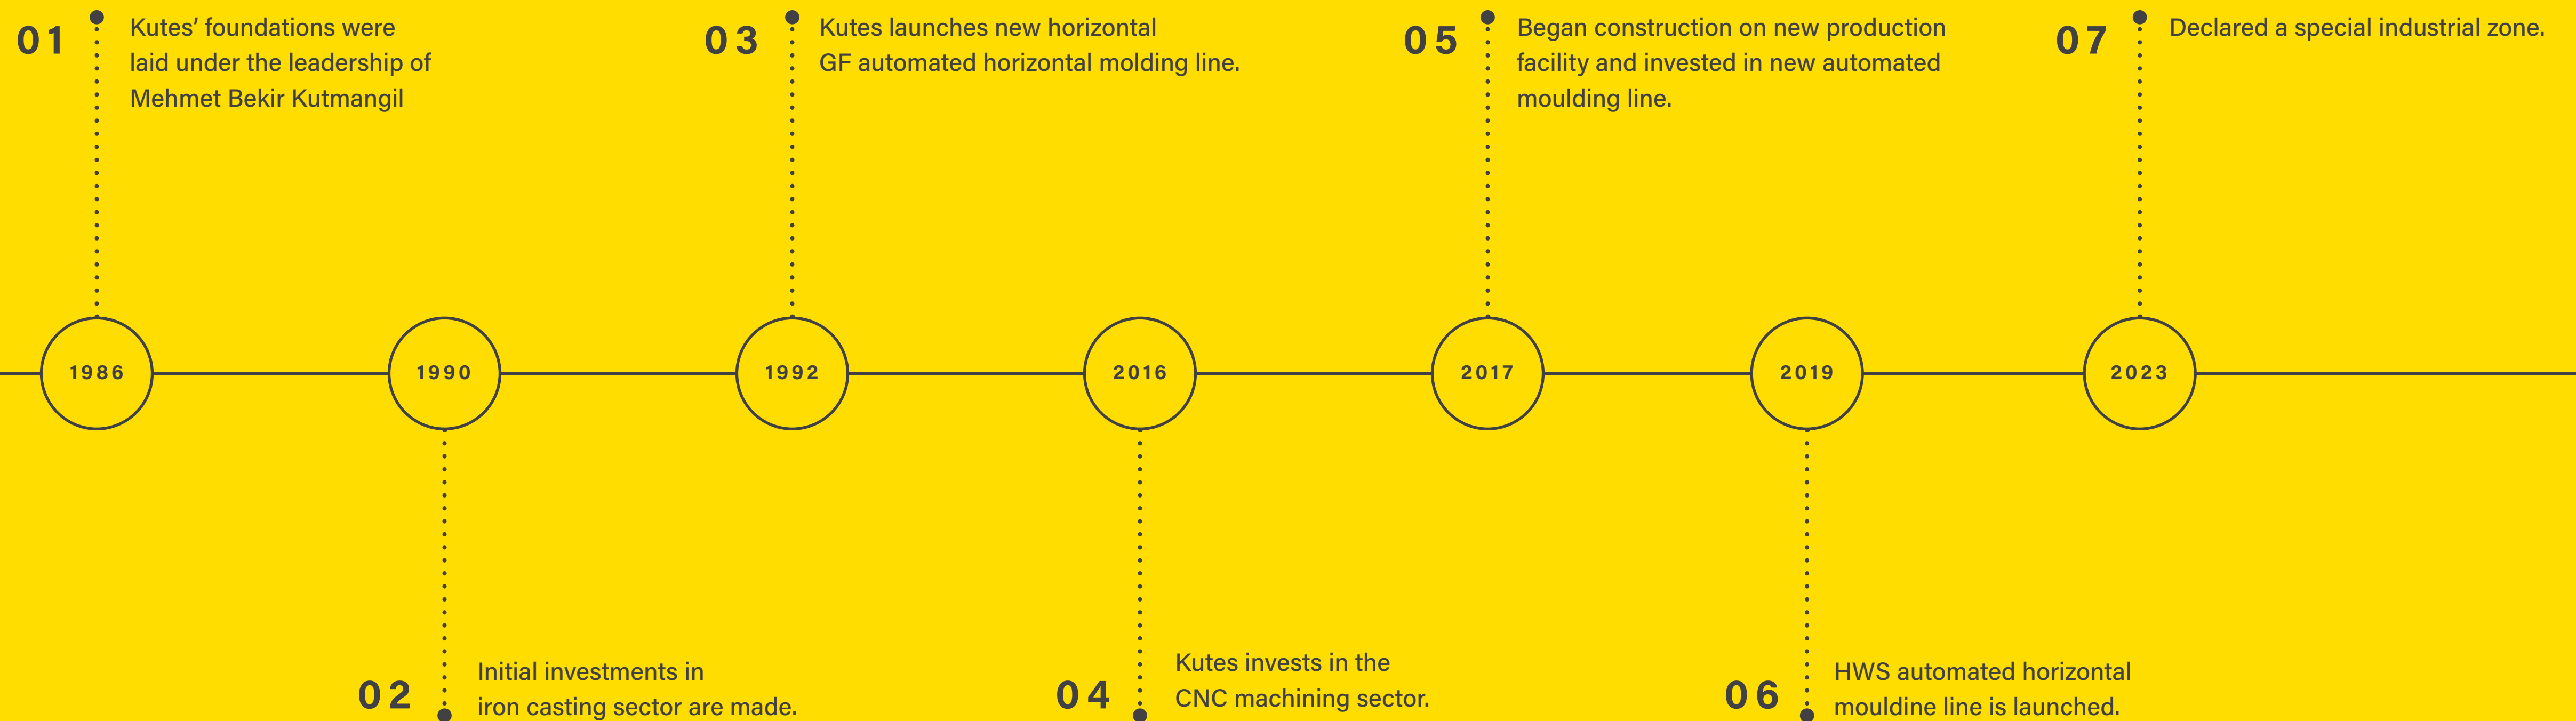

In order to fulfill our responsibilities to our customers, to future generations and the world, we are working towards starting the "**New Iron Age**" at our facilities in **Terkidağ Çorlu** and leveraging our **30 years** history and the talent of our nearly **350 employees**.

In **Turkey's third largest industrial zone**, we are located between Istanbul and the European Union as a **special industrial zone** with a total of **207,000 square meters**, 30,000 of which is covered. We are **35 km away from the sea port** and **100 km away from Istanbul Airport**, the world's largest airport, with the status of **Authorized Economic Operator (AEO)**.

Our 30+ year history provides us with the experience necessary to navigate the future and find new paths to help our customers succeed.

A yellow-tinted photograph of an industrial setting. In the foreground, a white robotic arm with "FANUC Robot R-2000iC 210F" printed on it is positioned over a work area. The background shows a large industrial structure with multiple levels, some labeled "CHEM". The entire image has a monochromatic yellow-green color scheme.

**WE CAN ACHIEVE ANYTHING
WITH OUR WILL WHICH
CAN EVEN SHAPE IRON.**

30
YEARS

30+ years of iron casting experience and
5 years of CNC machining experience.

9
SECTORS

We serve 9 different sectors.

15
CERTIFICATES

We have added a total of 15 certifications,
11 of which are quality certificates, to our
quality assurance system.

75 M
EUROS

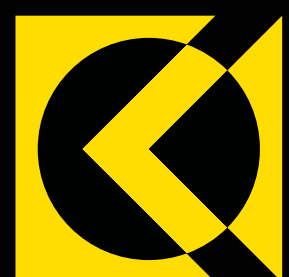

We have completed investments of
75 million EUR over the past 6 years.

50.000
TONS

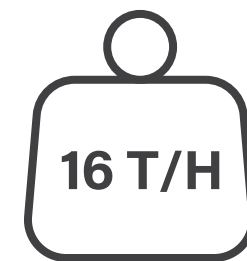

We have 50,000 tons of iron casting
capacity and more than 100,000 hours of
machining capacity.

3
CONTINENTS

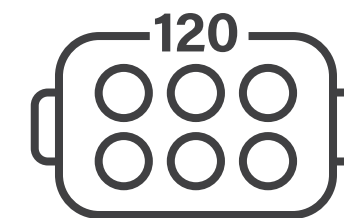

Our products are sold on three continents
and more than twelve countries including
the USA, China, Italy, France and
Germany.

IN OUR IRON CASTING FACILITY:

16 TONS OF REMELTING
CAPACITY PER HOUR

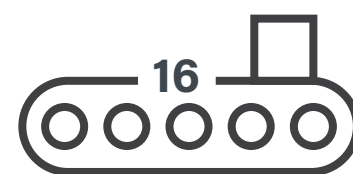

TWO HORIZONTAL MOULDING LINES
WITH 120 CAPACITY PER HOUR

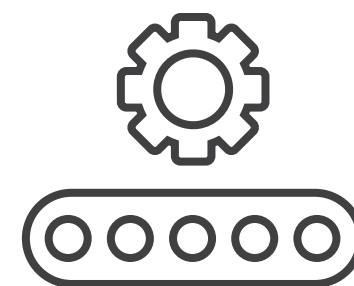

50,000 TONS
CAPACITY

CNC MACHINING FACILITY:

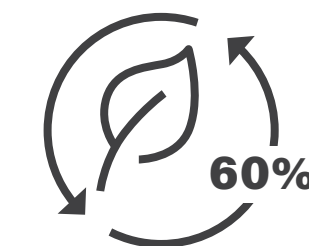

16 CNC MACHINING
CENTERS

ASSEMBLY
LINE

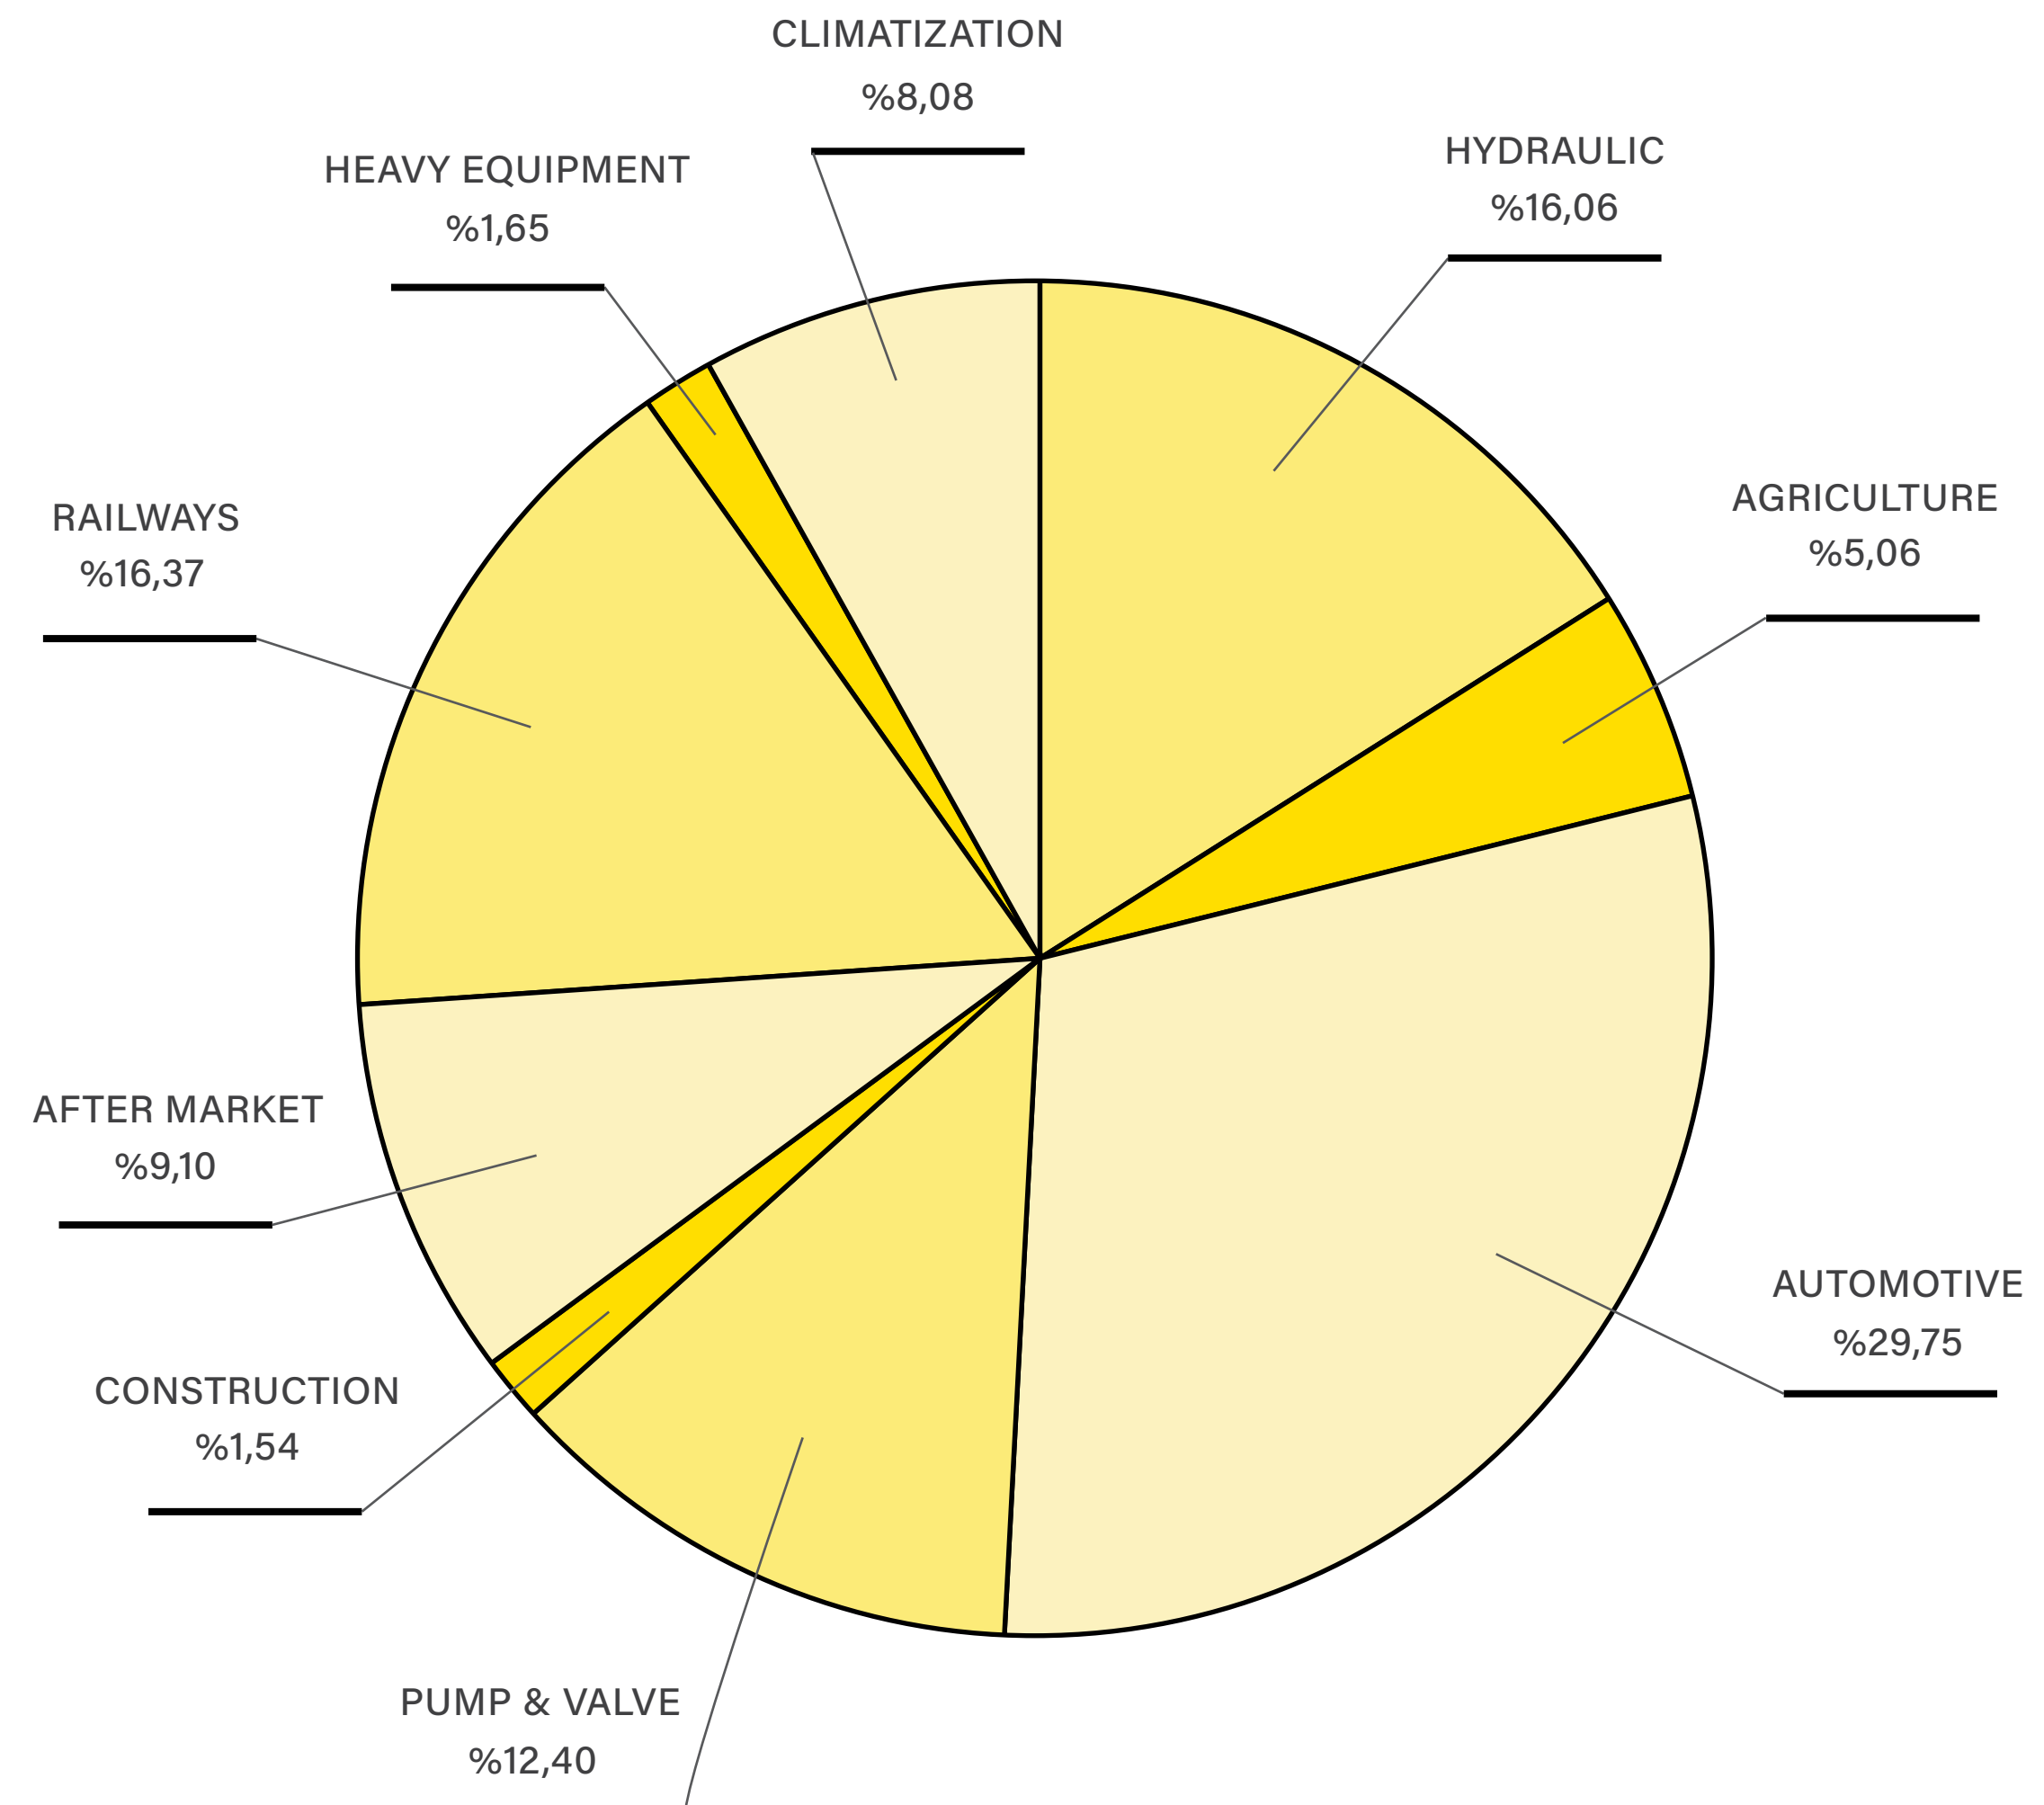

100,000 HOURS OF
MACHINING CAPACITY

60% GREEN
ENERGY

Market Distribution 2024

KUTES LOOKS BEYOND THE PRESENT, POSITIONING FOR FUTURE GROWTH.

For the future, which we have deemed as the New Iron Age, we have planned new projects under our Kutes Operational Excellence Program.

With Industry 4.0, we strive to become the leader in the cast manufacturing sector while also increasing our production flexibility. We aim to concentrate on digitalization and quality management while establishing smart production lines.

With a focus on continuous improvement, we will use our resources in the most efficient manner while responsibly minimizing our impact on the environment.

INNOVATION

With continuous innovation being our motto, we will continuously move forward to better ourselves in product range, quality and supply periods while providing for our stakeholders.

DIGITAL TRANSFORMATION

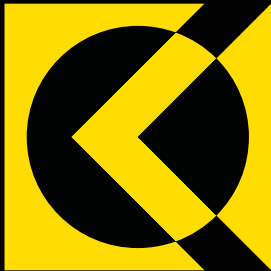

We will increase our agility by making our processes more observable, improvable and monitorable.

TOTAL PRODUCTIVE MAINTENANCE

With TPM (Total Productive Maintenance) practices we aim to develop and strengthen the problem solving skills of our employees while actively ensuring participation in improvement activities and maximizing the efficiency of our production equipment.

INDUSTRY 4.0

OPERATIONAL SUSTAINABILITY

PROACTIVE ENVIRONMENTAL COMPLIANCE

We take sustainable steps regarding energy use and natural resources, and are always looking to use technology to improve efficiency and be a leader in sustainable innovation.

With our quality policies, we aim to secure the satisfaction of our partners while emphasizing safety and quality in our efforts.

A GREEN FUTURE WITH GREEN CASTING

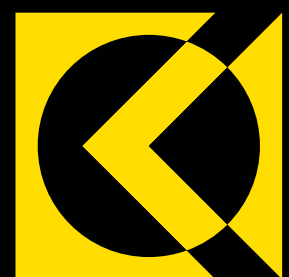

Creating sustainable solutions to use energy and natural resources efficiently is not an option but a responsibility for us.

Our biggest goals are to be the pioneer of sustainable innovations in our sector and to change the idea that the casting industry is not eco-friendly.

We are currently working on projects such as using renewable energy sources, developing our facilities in harmony with nature and training sustainability conscious personnel.

We also incorporate sustainability into our future planning/targets.

We aim to be carbon neutral till 2033.

A GREEN FUTURE WITH GREEN CASTING

We are taking steps to ensure that 90% of the energy used in our casting facilities comes from renewable sources.

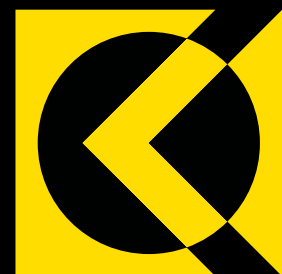

We completed ISO 14064 projects and ISO 50001 certification process in 2023.

So why are we doing all of this? Because we love what we do and we feel a responsibility to our world and our environment.

You can find our sustainability report here:

**WE CONSIDER OUR CUSTOMERS
AS OUR BUSINESS PARTNERS.**

At Kutes we have worked with customers from over
12 countries spanning **3 different continents**.

Our customers are diverse, ranging from large multinational corporations to new and innovative startups.

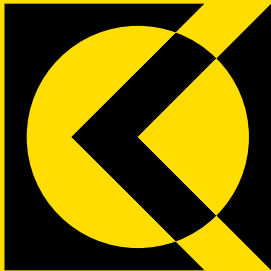

Each customer represents an important and valuable reference for us.
